

Asmit Sharma, Cyber Security Engineer

Ajmer, India, +91 8890626388, asmitsharma674@gmail.com

PROFILE

I am a security enthusiast, philomath, and learner. I believe in becoming an asset to the technical world by enhancing security for its more widespread use or, at the very least, proper implementation and research.

EDUCATION

Sep 2022 — Sep 2023	M.Sc., Newcastle University	Newcastle upon Tyne
Aug 2018 — May 2022	B. Tech., University of Petroleum and Energy Studies	Dehradun
Graduated with Honors with specialisation in Cyber Security & Forensics.		

PERSONAL PROJECTS

Apr 2023 — Aug 2023	M-Stego	A research-based project done to find differences between already used steganographic algorithms for video files and a tool developed for embedding encrypted messages in a video file.
Jan 2023 — Mar 2023	A bluetooth secure chat system with end-to-end encryption	A secure chat application using Bluetooth as the medium of communication with end-to-end encryption using the Deffie-Hellman key exchange for authentication and the Double Ratchet algorithm for data encryption.
Jan 2022 — Apr 2022	Philomath	Web-based UI using streamlit to show comparative time series prediction analysis between various dense feedforward and recurrent neural networks using tensorflow.
Aug 2021 — Dec 2021	Kalam - An interactive web development learning platform	A full-stack interactive and hands-on web development learning platform.
Jan 2021 — May 2021	Steganography using custom encryption algorithms	A terminal UI application for securing information through the hybrid implementation of steganography and encryption using custom designed encryption algorithm.
Aug 2020 — Dec 2020	Log Analysis using regular expressions and pattern matching algorithms	terminal user interface application for parsing, managing, analysing, and converting unstructured log files into a structured file format (such as CSVs).

EMPLOYMENT HISTORY

Jun 2021 — Aug 2021	Intern, PHEME Software Pvt. Ltd.	- Handling security aspects of the web application such as user authentication and IAM. - Created APIs using Flask. - web development using ReactJS.
---------------------	---	--

CERTIFICATES

IBM Cybersecurity Analyst Professional Certificate

Preparing for Google Cloud Certification: Cloud
Security Engineer

AWS Fundamentals Specialization

Python for Everbody

The Bits and Bytes of Computer Networking

SKILLS	Python	Wireshark
	GCP	Metasploit
	AWS	Burpsuite
	JavaScript	Autopsy
ACHIEVEMENTS	Springer: A systematic approach for analysing log files using string matching and regular expressions Developed a tool to analyze log files and provide support for pre-processing and structuring this data to extract insights. This structured data can be saved and used further according to the problem.	
PRESENTATION	International Conference on Cyber Security and Digital Forensics 2021 (ICCSDF 2021) Paper presentation event held by Springer to publish papers in the book series "Lecture notes on Data Engineering and Communications Technologies".	
LANGUAGES	English	Hindi
INTERESTS	Cyber Security: Red Teaming Cyber Security: BlueTeaming Cloud Security Digital Forensics
